

# TECHNICAL DATA SHEET

## SAE GEAR OILS

### Product Description:

A range of monograde gear oils manufactured from solvent refined paraffinic base oils which exhibit oxidation stability and excellent rust protection. They are available in two viscosities and are suitable where a non EP additive gear lubricant is required.

### Benefits:

- High resistance to oxidation.
- High viscosity index (good viscosity / temperature relationship).
- Excellent wear protection.

### Applications:

Gearboxes & various other applications where a straight non EP gear oil is called for.

### Product Profile:

API: GL-1

### Typical Test Data:

	SAE 80	SAE 90
Specific Gravity @ 16°C	0.884	0.893
Kinematic Viscosity mm <sup>2</sup> /S:		
@ 40°C	77	177
@ 100°C	9.5	16.5
Viscosity Index (VI)	100	97
Flash Point C.O.C. °C	225	230
Pour Point °C	-12	-9
