

### Agri Plant Horticultural Two Stroke

A low ash two stroke petrol engine oil manufactured from solvent refined paraffinic base oils blended with specially selected low ash detergent/dispersant additives. It is suitable for both premix and injector systems.

#### Benefits:

- Excellent deposit and wear control.
- Protects against piston and cylinder scuffing.
- Readily miscible in petrol (self-mixing).
- Reduced deposit formation.

#### Applications:

Recommended for air cooled two stroke engines requiring this performance level and for use in water cooled two stroke engines not prone to pre-ignition.

Usage ratio 1:50 of Two Stroke to fuel.

#### Product Profile:

API TA, TB & TC

#### Typical Test Data:

SAE Viscosity Grade	-	30
Specific Gravity at 16 °C	-	0.879
Kinematic Viscosity mm <sup>2</sup>		
@40°C	-	58
@100°C	-	8.2
Viscosity Index (VI)	-	102
Pour Point °C	-	-20
Total Base Number (TBN)		
mg KOH/gm	-	1.7
Sulphated Ash % wt	-	0.19
